Every home should have Plenty of Cherry Trees

Buy all you need this Spring while prices are so low

These cherries are budded on the best quality Mazzard rootstocks obtainable. Mazzard roots are fibrous and greatly lessen transplanting losses. They are usually much higher priced.

All-season CHERRY COLLECTION CHOICE 3 TO 4 FT. \$1.48 CHERRY TREES

2 Collections for \$2.75

2 Black Tartarian 3 Montmorency 1 Napoleon Bigarreau

Thus you get early, medium and late cherries—both sweet and sour—for almost two months. These trees are nicely branched and have wonderful roots.

If you want the same collection in our large selected trees, the price will be \$2.50 not postpaid for all 6 trees or 2 collections (12 trees) for \$1.75 not postpaid.

Barnes Bros. Fruit Trees

Barnes Brothers has been producing fruit trees of high quality for more than 40 years. These trees are now grown on the best North Western understocks obtainable and carefully handled by skilled and experienced men. Raised in our difficult Northern climate, the trees succeed well in any part of the country.

We grade our fruit trees primarily by caliper, height being only approximate. This places many of our trees in the second grade which might be sold as first by those who grade only by height. We consider that this gives more satisfaction to you.

VARIETIES

Black Tartarian—A large purpleblack, red fleshed cherry of excellent flavor. The most popular dark sweet cherry,

English Morello—Medium sized, Dark red. A very productive late sour cherry.

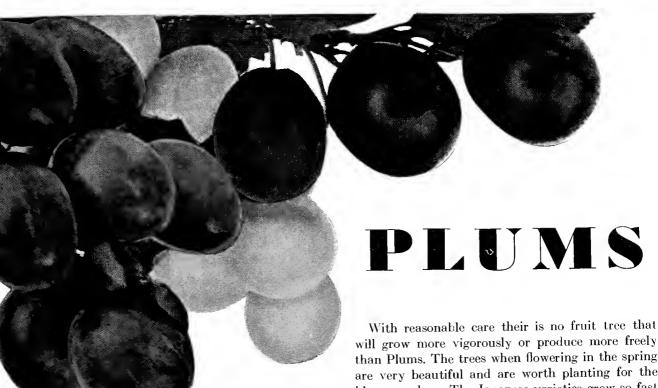

Governor Wood—Large, light yellow with red eheek. Sweet, Early. One of the best.

Montmoreney — Light red. Midseason. Bears young. Largest, most productive and popular sour eherry.

Napoleon Bigarreau—A large yellow red checked, sweet cherry which follows Governor Wood.

Schmidt's Bigarreau—Large, black, late. Fine flavor. Bears abundantly.

Yellow Spanish—Pale yellow, red eheek. Flosh firm and delicious.

will grow more vigorously or produce more freely than Plums. The trees when flowering in the spring are very beautiful and are worth planting for the blossoms alone. The Japanese varieties grow so fast and bear their large tasty fruits so heavily that they have a tendency to be shortlived. Plant a few trees

yearly. These European Plums may be grown farther north than the Japanese. Moreover, the fruit has a wider range of color and longer time of ripening.

Plum Tree	Price	es	
11 al., 5-7'	Each \$.60	10 \$5.00	100 \$30.00

JAPANESE

Abundance—Red, yellow fleshed, of good quality. Fine for canning. August. Hardy and productive.

Burbank—Yellow, red blushed. August. Good keeper and shipper.

Red June—Vermillion red, yellow fleshed. Late July. Productive.

Satsuma-Purple-red, juicy and sweet. Late. Fine for canning.

Wickson—Large and heart-shaped. Amber yellow with red blush. Sweet. September. Not hardier than peach.

EUROPEAN

Fellemberg (French or Italian Prune) — Large. Oval in shape. Purple. Freestone. September.

German Prune—Very large, oval. Purple. Good quality. Sweet. One of the most popular for canning. September.

Imperial Gage—Greenish-yellow. Good quality. Freestone. August. Tree best adapted to sandy soils.

Lombard—Medium and round. Purple. Excellent quality. August. Best for culinary purposes.

Reine Claude — Greenish-yellow. Fair size. Semifreestone.

IT GROWERS ... ATTENTION!

Buy your Peach Trees from Barnes Brothers and receive vigorous, well-grown trees with splendid roots.

All Peach Trees are stored in modern frost-proof cellars beyond the possibility of injury during the winter. We do not handle Peach Trees in any other manner.

PLANT HARDY NEW ENGLAND GROWN PLANT MATERIAL at "NEW DEAL" PRICES

Ornamental and Shade Trees

Approximate height of mature trees indicated.

Acer dasycarpum (Silver Maple)-100'. Very rapidly growing. Makes a graceful, spreading tree for lawns or parkways within a short time 8-10', \$1.00: 10-12', \$1.75.

Acer d. Wieri (Wier's Cutleaf Maple)-80'. Distinguished by its gracefully drooping branches and delicately cut foliage. 8-10', \$1.25.

Acer platanoides (Norway Maple)-75'. A symetrical tree with deded head. Valuable as a shade tree and for street planting. 6-8', \$1.50; 8-10', \$2.00; 10-12', \$3.00.

Acer saccharum (Sugar Maple)—80'. Excellent street or shade tree. Upright and dense. Leaves turn bright red and yellow in the fall. 6-8', \$1.50; 8-10', \$2.00; 10-12', \$3.00.

Betula alba (European White Birch)-10', Slender and graceful with pendulous hranches, bark white, 6-8', \$1.50; 8-10', \$2.00.

Catalpa hignonoides nana (Umhrella Catalpa)—8′. A straight, slini trunk with dense rounded head of large, heart-shaped leaves. For formal effects, 5-6', \$1.00.

Platauus orientalis (Oriental Plane)-75'. A very successful shade tree for street plantings as it is suited to a variety of soils, grows rapidly and is symetrical in contour. Stands smoke and dirt and is remarkably free from insects and diseases. 6-8', \$1.00; 8-10', \$1.50.

Populus nigra italica (Lombardy Poplar)-100'. Slender, spire-like tree with upright branches. Very effective for high creens and vertical accents, 6-8', 75c; 8-10', \$1.00; 10-12', \$1.25

Salix babylonica (Babylon Weeping Willow)—40'. Long, pendulo hranches droop to the ground with matchless grace. They create exquisite effects beside water where they thrive, 6-8', \$1.50.

Salix pentandra (Laurel Willow)—30'. Dark, ahiny green leaves. Fine for screens, seashore or other waterside plantings, 6-8', \$1.00 ricana (American Linden)—100'. Tall, rapidly growing tree.

Excellent for lawns or parks. 8-10', \$2.00. Ulmus americana (American Elm)—120'. New England's stately and graceful tree. Popular for street and park planting. 8-10', \$1.25.

Ulmus a. Moline (Moline Elm)—A straight conical tree. Very compact. Medium sized. A new form of Elm. 8-10', \$1.50; 10-12', \$2.50. Ulmus pumila (Chinese Elm)-70'. Rapidly growing. Will thrive in

dry soils and under adverse conditions. 6-8', \$1.00; 8-10', \$2.00, TREES FOR FLOWERS AND FRUIT

Cercis canadensis (Red Bud)—In May, this tree is covered with dense masses of deep rose-pink flowers. A small tree with a broad round top and attractive on a lawn at all times, 4-5', \$1.25.

Cornus florida (White Flowering Dogwood)—The well-known White Dogwood. Flowers in spring. Splendid foliage dense enough to give shade in summer. Bright scarlet herries and red leaves in Fall. One apped. 3-4', 90c; 4-5', \$1.25.

Cratacgus oxyacantha coccinea (Paul's Double Scarlet Thorn)— Recommended for its rich, luxuriant foliage and double, deep scarlet flowers which come in late May. 4-5', \$1.75.

Koelreuteria paniculata (Varnish Tree)-30', A charming lawn tree with long clusters of showy, golden yellow flowers in July. 4-5', \$1.50. Malus Eleyi (Eley Flowering Crab)-15'. Flowers arc a rich wine red,

semi-double in abundant clusters. Young shoots and leaves are red. In Autumn dark red fruits are brilliant. 4-5′, \$1.00; 5-6′, \$1.50. Note: We have about 25 other varieties of Flowering Crabs but have selected this espeically fine one to offer here. If you are interested in other named varieties write us.

Prunus pissardi (Purple Leaf Plum)—A small tree with pinkish white flowers and lustrous dark purple leaves which remain purple all the season, 5-6', \$1.00.

THE FLOWERING CHERRIES

Prums japonica (Japan Flowering Cherry) — Double, hlush-pink llowers in April followed by small red fruits. Heavy transplants 5-6', \$1.25

..... 2-3 feet

Kanzan—One of the finest of all flowering cherries. Bright deep pink flowers, dark in hud and very double A hardy and rapid grower. Heavy transplants 4-5', \$2.25.

Niagara—White, Sweet, Large, compact bunches, Midseason, Each, 20c; 10, \$1.50.

Norden—Blue. Fine table grape, Ripens earlier than Concord. Each, 20c; 10, \$1.50.

Columbian—Purple. Berries very large and yield tremen 10 for 60c; 100 for \$5.00; 1000 for \$10.00. Latham—Red. Large berries. Vigorous. Hardy. Prolific. Plum Farmer—Black. Large. Firm. Early. Popular. pt. Regis—Red everbearing. Quality good. Size medium.

Champion—Medium size, Dark red. Prolific, Everbearing Mastodon and Champion 100 for \$2.00; 1000 for \$12.00.

SMALL FRUITS

A RARE OPPORTUNITY

The Japanese Yew

Taxis cuspidata (Spreading Japanese Yew) (Illustrated above)—This is rapidly hecoming popular as its sterling qualities are being realized. It has fine shiny foliage which is a rich, dark green through the year. From late summer to winter, bright scarlet berry-like fruits are most attractive. It is easily trimmed and due to its ability to stand varied planting conditions, including dense shade, it has many uses in the landscape. It is low growing and wide spreading and certainly adds refinement and distinction to any planting. A truly aristocratic member of evergreen's Royal Family. 12-15", 80c; 15-18", \$1.25.

ASPARAGUS

This asparagus is the finest you can plant. Shoots are large, of good color and prolifie. It starts growing early and continues over a long season. Rust resistant. Heavy 2 year roots, 100 for \$1.50; 1000 for \$10.00.

Spiraca Thumbergi—1: April and May its delicate arching branches bear fine bright green foliage and a profusion of white flowers. 2-3', 35c each.

Spiraca trichocarpa (forcan Bridal Wreath)—A handsome new shrub with flowers similar to Spiraca Van Houttei but two weeks later. 2-3', 35c each.

later, 2-3′, 3 c each.

Spiraca Van Houttei—A popular and well-known medium size shrub. Covered in late May and June with pure white flowers. Foliage dark green and fine in texture. 2-3′, 35c each.

Symphoricarpus racemosus (Snowberry)—This low plant hears pinkish white flowers in summer and large white berries in fall and winter. A superb, fine textured shrub for borders. Grows to 5′ and doesn't mind shade. 2-3′, 35c each.

Symphoricarpus vulgaris (Coral Berry)—A small shruh that thrives in shade. Its small pink clustered berries last until late winter. 2-3′, 35c each.

Syringa microphylla—The chief attraction of this new lilac is its double flowering period for it not only blossoms in May with the others but has another scason in September. A densely twiggy shrub to 8′. Would make a splendid hedge. 2-8′, 75c each. Syringa vulgaris (Common Purple Lilac)—But not less valuable for being well-known. 2-3', 50c each.

Viburnum opulus (Highhush Cranberry)—Prized for its dense, brilliant green foliage and large bunches of crimson berries which deek the branches in fall and winter. 2-3′, 50c each.

Viburnum opulus sterile (Common Snowhall)—Dense and spreading. Round flower clusters ahout 3″ across. Borne profusely on drooping branchlets. 2-3′, 50c each.

Vibrirum tomentosium plieatum (Japan Snowball)—Shrub with compact upright habit. Bears profusely in late May and early June. Dense flat topped clusters of pure white flowers. 2-3', 75c each.

Weigela Eva Rathke—A small spreading shrub to 5' with dark red flowers in July. 2-3', 50c each.

Weigela Hendersoni—One of the strongest growing of the Weigelias. Large, deep rose flowers in June. 10′. 2-3′, 50c each.

Weigela rosea (Pink Weigela)—This popular Weigela bears many deep pink flowers in June. A tall shrub to 8′. 2-3′, 50c each.

Zanthorbiza apiifolia (Yellow Root)—A dwarf shruh to 2'. Unexcelled as a bank hinder and much used as ground cover. Foliage is handsome and in autumn turns golden yellow. Thrives in any soil in sun or shade. 3 year, 35c each.

A special shrub offer described on back cover

We may only mention that we have a fine assortment of Azaleas and Broadleaved Evergreens, including the shrubs, Mahonia Aquifolium, Leucothoc Catesbaei, Pieris floribunda, and P. japonica, Daphne Cncorum, Kalmia(Mt. Laurel) and Rhododendron carolinianum, evergreen Euonymus vines and the useful ground covers for shady places

PEARS • HARDY PRODUCTIVE Here is a list of pears that will supply excellent fruit for market and home use

from August well into the winter. Pears will grow on almost any good soil but thrive best in rather heavy loam or clay. Plant about 20' apart.

Bartlett-Most popular pear for home and market use. Fruit of fine quality and rich flavor

Beurre Bose-Very large, deep yellow, overspread with russett. Unsurpassed in quality and flavor. Juicy. October and November

VARIETIES

Belle of Georgia—White with red cheek. Freestone. Late August.

Carman—White, red check. Semifreestone. Mid-August.

Cumberland—A large white of good quality. Dark red cheek. Nearly freestone. Mid-August. A new variety recommended to replace Carman.

Early Elberta—Yellow. Ripens a few days before Elberta and is similar to it in quality.

Eclipse—Dark red, yellow fleshed. Freestone. Late August. Texture firm and quality good. A seedling of Belle of Georgia.

Elberta—Large, yellow with red check. Freestone, Early September, Standard commercial peach.

Golden Jubilee—Large golden yellow, red blushed. Freestone. Mid-August. Best early yellow. This is an outstanding new peach which is now extremely popular.

J. II. Hale—Very large, yellow flesh. red cheek, freestone. Early September. Excellent in quality and flavor. The attractiveness of the fruit commands a fancy price.

Lizzie—Large, lemon yellow with nice red cheek. Freestone. Late September. A good shipper. Has little fuzz.

Nectar — Medium size. Yellow, crimson cheek. Semi-freestone. Ripens in mid-August following Greensboro. One of the hardiest in bud.

Rochester — Large. Yellow. Good quality. Freestone. Mid-August.

South Haven—Large, yellow with blushed cheek. Freestone. Late August. New and popular, hardy and productive.

udded, Bear Young, Sardy . Grow Your Own

Who doesn't like fresh home grown peaches? They need but little room, grow quickly and bear young. You will never know how good peaches can taste until you pick them fully ripened from your own trees. The price of just one bushel of peaches you buy, will pay for enough trees to bear many, many bushels of deliciously flavored peaches. Plant 16-18 feet apart.

The growing of peach trees has been a specialty with us for many years, and we use every care and precaution to have these trees healthy and true to name. We spare no expense to obtain the best seed and budding material.

Ripening periods are for average conditions in Connecticut.
